Tools Ribbon

As of version 2.5, The tools ribbon includes the following

- DIC (Digital Image Correlation) module
- QR code generator module

DIC

Opens a DIC (Digital Image Correlation) module to analyze a sequence of images for motion, displacement and strain. Useful for high speed collision events, impact or standard mechanical testing. Can also be used to build 3D architectures from 2D CT data.

QR

QR Generator. Opens a dialog window to create a QR code from SMARTree keyword data. Useful for generating virtual or physical labels on materials, samples, production travelers or finished products.
